ASBESTOS INSPECTION AND AWARENESS FORM

Effective July 1, 1993, the Virginia Uniform Statewide Building Code requires that all buildings to be renovated or demolished shall be inspected for the presence of asbestos-containing materials, and subject to exemptions, appropriate response actions shall be undertaken. The following form is to be completed by all applicants for Building Permits for renovation or demolition. A completed form will contain one box checked below and must be signed by the owner or authorized agent of the owner(s).

Owner(s): _____

Address: _____

Address where work is to be performed: _____

Certification

AS AN OWNER, OR AN OWNER'S AGENT, OF THE ABOVE BUILDING, I HEREBY CERTIFY THAT:

- The above building is a single family dwelling, or is a residential housing building containing four or fewer units, and is exempt from asbestos inspection requirements. (NOTE: This exemption does not apply if the proposed renovation or demolition is for commercial or public development purposes); or
- The combined amount of regulated asbestos-containing material involved in the renovation or demolition is less than 260 linear feet on pipes, or less than 160 square feet on other facility components, or less than thirty-five cubic feet off facility components where length or area could not be measured previously, and is exempt from asbestos inspection requirements.
- This building is exempt from asbestos certification requirements because the original building permit was issued after January 1, 1985.

If NONE of the boxes above has been checked, and if the building permit application is for repair or replacement of roofing, floorcovering, or siding materials and the use is not a school, asbestos inspection requirements may be satisfied by checking one of the two following boxes:

- The materials to be repaired or replaced are assumed to contain asbestos and that appropriate response actions will be accomplished by a licensed asbestos contractor or a licensed RFS contractor; or
- An inspection of the materials to be removed was accomplished by an RFS inspector and analysis of the sample showed no asbestos to be present.

IF NONE OF THE FIVE (5) BOXES ON THE FRONT PAGE HAVE BEEN CHECKED, ONE OF THE REMAINING TWO BOXES HEREUNDER MUST BE CHECKED IN ORDER TO COMPLETE THIS FORM:

- The affected area of the above building to be renovated or demolished has been inspected for the presence of asbestos by an individual licensed to perform such inspections and that no asbestos-containing materials were found; or
- Asbestos-containing materials in the affected area of the above building to be renovated or demolished will be subject to appropriate response actions in accordance with all applicable laws relating to asbestos abatement.

In accordance with S36-99.7, I further certify that the abatement area will not be reoccupied until any required response actions have been completed and final clearances have been measured and found to be within regulated tolerances.

Printed Name: _____
